

Making Positive Moves: Vision and values project

We want to tell you about the visions and values project

It was developed to find out more about our research team and what is important to us

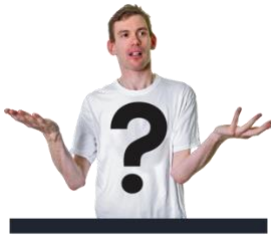

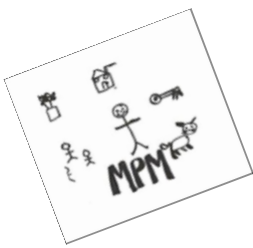

This means thinking about our values

Being clear on our values helps us work with other groups similar to us

We asked questions to 3 different groups involved in the project

The questions helped us think about what is important to us and our skills

What did we find out?

We looked at the main ideas from each group meeting

This helped to show our values, vision and mission of the project

Our vision was:

Making a positive impact to people's lives and,

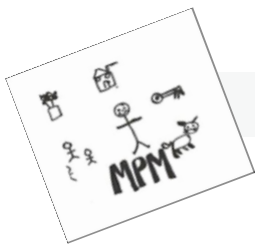

making sure they have rights

Our mission was:

Learning from people with disabilities about their experiences and,

making sure we use this information in our work

Our values were:

Working together to make sure people have equal opportunities

Building connections with people who can help make changes to people's lives

Being respectful about the experiences people share with us

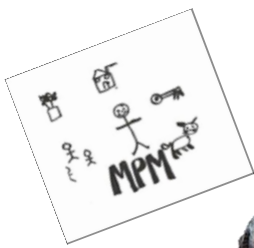

We are passionate about the work we do

Making sure we listen to people's stories

Making sure the work we do can have an impact across the country

Reflection

We are proud of this piece of work

Bringing people together to have these conversations showed how caring everyone involved is

It also showed us the importance of the research and projects we are doing

This is to hear the voices and experiences of people with learning disabilities and,

Make the lives of people with learning disabilities better and,

We would love to hear from you if you have any comments or want to share any of your thoughts.
